Take your business to new heights – with SAP ERP solutions for SMEs

Drive innovation and automate your core processes with SAP Business All-in-One. These comprehensive, industry-specific ERP solutions for fast-growing small or medium enterprises (SMEs) can help manage every aspect of your business – from financials and HR to sales and procurement. These affordable solutions are designed to fit your needs – both now and in the future.

- Develop innovative products and services for new and existing markets
- Achieve operational excellence with streamlined logistics and manufacturing
- Improve financial performance with tighter internal controls and insights

- Connect headquarters, subsidiaries, and partners in a single network
- Add CRM, supplier relationship management, and BI functionality as you grow

Solution Details

Enterprise Resource Planning – ERP

Support and streamline your core business processes – from financials and accounting to human resources, operations, and corporate services.
- Create accurate financial statements and integrate all operative transactions
- Boost customer satisfaction by consistently meeting demand and enhancing service
- Improve product lifecycle management and manufacturing operations
- Get real-time business insights with powerful reporting and analytics
- Increase operational transparency and comply with evolving regulatory standards

Customer Relationship Management – CRM

Effectively manage all aspects of your customer relationships – with functionality to help improve and align your marketing, sales, and service operations.
- Drive customer demand, boost loyalty, and increase marketing ROI
- Identify, win, grow, and maintain profitable sales relationships
- Increase service revenue and profitability
- Generate more leads and close more deals with reporting and analytics

Supplier Relationship Management – SRM

Improve your bottom line. Cut procurement costs, build collaborative supplier relationships, streamline purchasing and sourcing processes, and more.
- Manage procure-to-pay processes in one, unified solution
- Enable self-service procurement and automated workflows
- Find the best source of supply and increase purchasing power
- Leverage built-in best practices and preconfigured roles
- Lower total cost of ownership by running SRM and ERP on the same server

Business Intelligence – BI

Get the real-time insights you need to make faster, more informed decisions – with tools for financial and operational reporting and analysis.
- Meet rigorous reporting requirements for financial accounting, logistics, and CRM
- Plan, measure, and control organizational processes
- Access virtually any available ERP report
- Integrate data with desktop applications

SAP Best Practices

Benefit from industry-specific configuration and best practices – based on SAP's 40 years of experience with companies in 24 industries worldwide.
- Minimize the staff required to manage evaluation and implementation
- Reduce implementation time and cost with streamlined configuration
- Decrease risk and stay on budget with preconfigured process templates

SAP NetWeaver Technology Platform

Quickly and cost-effectively add on to your existing solution as your business grows and your needs change – with the SAP NetWeaver platform.
- Get a business-focused infrastructure that supports continuous process improvements
- Benefit from an intuitive, integrated, and efficient user experience

SAP Sybase Adaptive Server Enterprise (SAP Sybase ASE)

Obtain unprecedented value along with a road map of continuous innovation through the preferred transactional database for SAP Business All-in-One.
- Gain predictability, consistency, and scalability via a high-performance, stable database as your business grows
- Simplify database monitoring, management, and maintenance lowering your total cost of ownership
- Save on support costs through product release cycles synchronized with and optimized for SAP Business All-in-One
